

PYROTHERM CS 120

Infrared calibration source/black body

Overview

Description

The infrared calibration source PYROTHERM CS 120 is used for calibration and examination of infrared radiation thermometers and infrared cameras in the temperature range from -15 °C to 120 °C .

A serial interface RS-485 (optional USB adapter) enables the control of the black body with PC. Digital PID controller and precision platinum resistance thermometer Pt100 provide excellent accuracy and stability. Dry air or nitrogen avoids condensation at low operating temperatures.
